

Dear contributors, colleagues and co-workers,

With Christmas approaching fast, I wish to give you a last update for this year. The most important news is that we have received continued funding from both the Swedish Cancer Foundation (“Cancerfonden”) and the Nordic Cancer Union with altogether 3.8 million Swedish krona. Furthermore, we now have randomised **1702 patients** from five countries. Thank you all for this fantastic work!

Number of randomisations per month

Cumulative number of randomisations from start of trial

As I have announced before, we are planning an independent safety analysis of the first 2000 patients to take place on May 12, 2020. As a preparation to this, and in order to get as valid and complete data as possible, I will be in touch with each site with the requirement to update your respective patient data in the eCRF during spring 2020. Let us all work together to register all potential events in good time so that the safety analysis truly reflects the effects of the treatment that the SENOMAC trial aims to assess!

You will also have heard that we have welcomed a new member in our team responsible for quality of life measurements and questionnaires: Matilda Appelgren (matilda.appelgren@ki.se) is now our study nurse coordinating these efforts and giving you feed-back on response rates, and she is also the person whom to contact with any related questions or requests for new return envelopes.

I thank you all for your fantastic efforts for the SENOMAC trial this year. Please also consider the **following table and figure, and please share this newsletter with your colleagues and co-workers.**

My best wishes for peaceful and quiet Christmas holidays,

Jana de Boniface,
for the SENOMAC steering committee and the sponsor Karolinska Institutet.
jana.de-boniface@ki.se or jana.de-boniface@capiostgoran.se

Table: Number of site-specific randomisations as of **December 5, 2019**

Please observe that this table only shows those sites that have generated randomisations as of 2019DEC05. For a list of all initiated sites, please see the trial homepage.

Site	Country	Initiation visit	First patient in	Number of randomisations
Karolinska	Sweden	2015-01-30	2015-02-27	104
