

Dear contributors, colleagues and co-workers,

I hope you have all had some well-earned time off during the Christmas holidays and a chance to recover and take a deep breath. While the covid-19 pandemic still rages (even though numbers in Stockholm look promising for the moment), I wish to give you another update on the SENOMAC trial. Until January 18, we had together randomised **2306 patients** (see following figures). I wish to express my gratitude and awe to all of you who manage to continue a steady inclusion into the trial despite all difficulties and am sincerely proud to work with you all. Denmark, you are going particularly strong, congratulations!

As I have announced earlier, we will have a second safety analysis in May 2021, now looking specifically at the new main endpoint overall survival. Your responsible research organisations and monitors will be in contact with each site soon in order to give instructions on the necessary scrutiny of data and update of new cases of recurrence and death.

I also wish to point out that this year may well be the last year of the trial, and therefore, I want to engage all of you in one last effort to include as many patients together as possible. The more patients, the more certain the results we achieve!

My best wishes for a healthier, happier and more social 2021!

Jana de Boniface,

for the SENOMAC steering committee and the sponsor Karolinska Institutet.
